

Category	1-3 (Low)	4-6 (Medium)	7-8 (High)	9-10 (Outstanding)
Innovation & Creativity	Minimal originality, the idea is unclear	Basic idea, participant has put in some creativity	Solid original idea, some uniqueness visible, but not fully creative	Highly original, very creative and novel idea
Technical Complexity & Execution	Simple technology, surface level understanding, incomplete, buggy	Uses a normal tech stack, understands code properly, some bugs	Uses a complicated tech stack, understands code functionality	Uses a complicated and efficient tech stack, is well versed in the codebase.
Functionality & Usability	Project barely works. Judges cannot freely use project	Basic features work, some UX issues. Judges can play with it, but very limited.	Most features work, usable interface. The experience is decent for judges	Fully functional, smooth UX, intuitive. Judges should enjoy using it
Design & Presentation	Poor design, unclear demonstration. Presenter lacks confidence.	Basic UI, average presentation. Presenter is not engaged	Nice UI, clear demo. Presenter is paying attention but makes mistakes	Polished design, excellent presentation skills. Presenter is confident.
Impact & Practicality	Low relevance or no practical use. Would not survive as a product	Some real-world use, limited impact. Would likely get no funding	Useful solution, decent impact. Might survive in the real world.	Highly impactful, scalable, solves real problems. Would survive as a product
Relevance to theme/track	The idea has irrelevant to the selected track	The idea is based off the track but doesn't follow it directly	The tracks problem statement is followed and is related	The idea completely follows the track, and is related to the theme

Quality of Code	Improper Syntax, Blatantly AI generated. Poor Organisation. Presenter is unfamiliar with the codebase.	The organisation is decent, the code is functional. Presenter doesn't fully understand the code.	The code is generally well written, code is commented, and is semi efficient Code is open source.	The code is exemplary, code is commented, code is efficient. Code is open source.
